

# ADAM LEIBLER

## Senior Learning & Performance Consultant | L&D Architect

Louisville, KY · 404.245.5471 · [adam.leibler@gmail.com](mailto:adam.leibler@gmail.com) · [linkedin.com/in/adamleibler](https://linkedin.com/in/adamleibler) · [adamleibler.com](https://adamleibler.com)

---

Certified performance consultant (Mager CRI · IMD) with 15+ years diagnosing capability and performance gaps before recommending — or rejecting — a training solution. When learning is the right answer, I architect AI-integrated systems that are adaptive, measurable, and built to last. I have owned full L&D lifecycles independently for federal agencies, Fortune 500 companies, and high-growth tech — from needs analysis and strategy through design, development, and Kirkpatrick evaluation. I operate effectively as the sole L&D expert in the room and as an embedded senior contributor on larger teams.

## CORE COMPETENCIES

---

Performance Consulting & Gap Analysis · HPT / Mager Methodology · Full L&D Lifecycle Ownership · AI-Integrated Content Development · Adaptive & Personalized Learning Architecture · Needs Assessment & Stakeholder Alignment · Learning Analytics & Kirkpatrick Evaluation (1–4) · Instructional Design (ADDIE · SAM · Agile) · eLearning Development (Articulate 360 · Captivate) · LMS Administration (Cornerstone · Workday · xAPI) · Section 508 / WCAG 2.1 Accessibility · Virtual & In-Person Facilitation

## PROFESSIONAL EXPERIENCE

---

### Senior L&D Consultant & Performance Architect

Oct 2022 – Present

*Independent Contractor*

Clients: U.S. Dept. of Health & Human Services (HHS) · U.S. Dept. of Veterans Affairs (VA) · FrontDoor · Diversified

- **Performance-First Consulting:** Conducted formal performance analyses for HHS and Diversified before any solution design began — identifying root causes, recommending targeted interventions, and in several cases redirecting scope away from training when learning was not the actual gap.
- **AI-Accelerated Development (HHS):** Designed and built an end-to-end generative AI workflow — LLM-driven content synthesis, automated scriptwriting, and storyboard generation — reducing development timelines by 40% while maintaining strict federal compliance and IACET standards. Owned strategy and execution independently.
- **Adaptive Learning Architecture (FrontDoor):** Architected an agentic compliance training engine that dynamically adjusts branching, pacing, and remediation pathways based on real-time learner performance data — delivering a genuinely responsive course experience at scale.
- **AI-Native Multimedia Production (VA):** Integrated synthetic avatars, AI voiceovers, and automated video pipelines into vILT and eLearning modules, enabling rapid refresh cycles and scalable IACET-compliant content without re-recording.
- **Cross-Client Stakeholder Alignment:** Partnered directly with senior leaders across all four organizations to define learning strategy, conduct needs assessments, and manage vendor relationships — adapting approach to each client's culture, compliance requirements, and business priorities.

### Program Manager – Engineering Education

Mar 2021 – Oct 2022

*Twitch Interactive · San Francisco, CA (Remote)*

- **Built L&D Function from Scratch:** Established a comprehensive engineering education program from the ground up for a global organization of 700–800 specialized software engineers — owning the full lifecycle from needs assessment through curriculum design, delivery, and evaluation across both an Engineering Onboarding Program and a Continuing Education Program.
- **Measurable Onboarding Impact:** Designed technical onboarding frameworks using instructional scaffolding and data-driven iteration, reducing time to first meaningful engineering contribution to under 30 days across a globally distributed engineering population.
- **Data-Driven Program Optimization:** Deployed analytics methodologies across cohorts — combining qualitative and quantitative measures — to continuously iterate on program effectiveness and ensure strategic alignment with engineering leadership priorities.

### Instructional Designer II

Sep 2017 – Mar 2021

*Terminix International · Memphis, TN*

- **Enterprise-Scale Program Design:** Served as strategic L&D partner to business leaders across a large distributed workforce — designing and building multi-modal programs at scale, including leadership development, compliance, and sales performance initiatives.

- **Sales Onboarding Program (1,200+ Learners):** Designed and built the sales onboarding program from the ground up, used by every new sales hire between 2019 and 2021 — partnering with regional sales managers who facilitated delivery across a geographically distributed workforce.
- **ASPIRE Field Technician Rebuild (1,800+ Learners):** Led the analysis, redesign, and full redevelopment of the ASPIRE field technician training program — modernizing and optimizing a legacy program previously facilitated by five regional trainers, serving all new field techs hired between 2018 and 2021.
- **ESA Certification Programs:** Partnered with a certified entomologist to design training courses and practice exams for pest control technicians pursuing IPM and ACE certifications from the Entomological Society of America — a high-stakes, technically rigorous program requiring domain-expert collaboration.
- **Workday & Workday Learn Rollout (10,000+ Users):** Designed and delivered the full suite of eLearning and video-based training supporting the organization-wide Workday implementation — reaching over 10,000 users across a complex, distributed enterprise.

## EARLIER CAREER

---

*Full career history available upon request. Highlights include:*

- **ELB Learning (eLearning Brothers)** — Senior eLearning Developer · Brandon Hall Award for Excellence in Learning: Best Use of Games & Simulation (2012–2016)
- **Independent Contractor** — L&D Consultant to NASA, Coca-Cola, AT&T, Procter & Gamble · U.S. Army Award for Maintenance Excellence (2007–2012)
- **Independent Contractor** — Learning Experience Designer for Vyond (GoAnimate), Ally Financial, USAA (2016–2017)

## CREDENTIALS & EDUCATION

---

**Certifications:** Criterion Referenced Instruction (CRI) · Instructional Module Design (IMD) — Mager Associates | Twitch Partner

**In Progress:** B.S., Organizational Leadership and Learning — University of Louisville (Expected mid-2026, 4.0 GPA)

**Prior:** A.A., Liberal Arts — University of South Carolina | Film Production — Savannah College of Art & Design (SCAD)
